

Candidate Evaluation Tool for Faculty Searches

- Use the Selection Criteria created specifically for this search to populate the form (consider using a Google Form to expedite the review and scoring process).
- Consider using a 1- 5 rating for each category (5 = excellent, 4 = very good, 3 = good, 2 = fair, 1 = poor), where any score of "1" would disqualify a candidate from moving forward.
- Calibrate the scoring form by first discussing and agreeing on the selection criteria, and then having all committee members independently score 5- 10 applications to assess reliability.
- Base scoring on career stage and expected accomplishments for that level- discuss the different expectations for each criteria.
- Each applicant should be reviewed using this form by a minimum of two- three search committee members for the full pool. Widely divergent assessments should necessitate a "tie breaker" review.
- Each applicant on the "long list" should receive a review and rating by all committee members.
- Weights can be assigned to different categories as needed (e.g., if Research should be 60% of the total score, the three research categories can receive weighting to make them proportionately 60%).
